

DELUX

Continuous flow GRAIN DRYERS

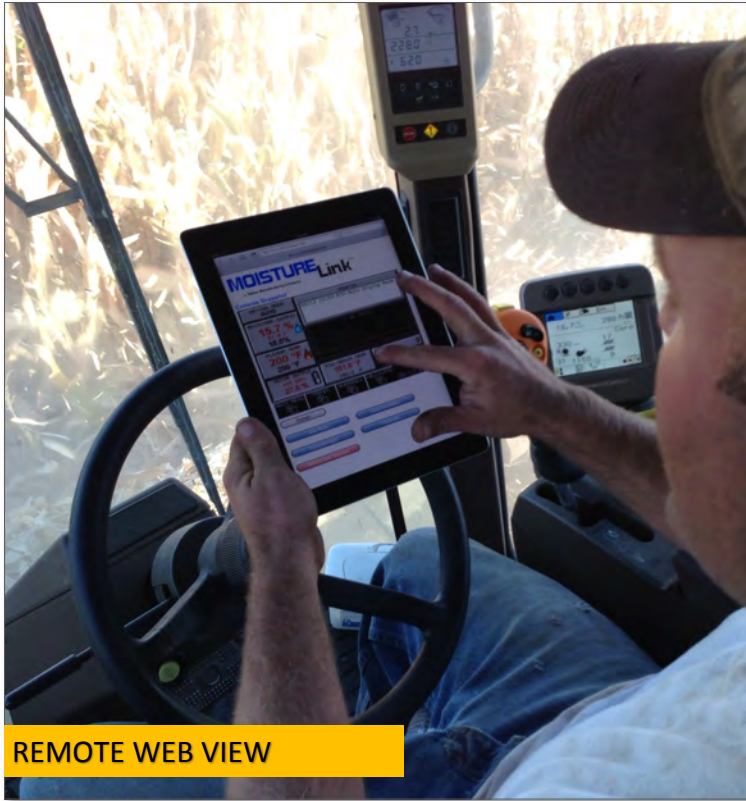

Retrofit Your
Grain Dryer!

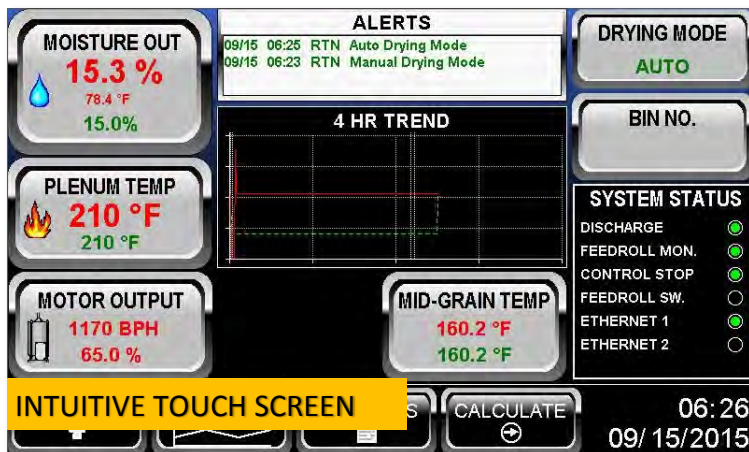

MOISTURELink™

MOISTURE & TEMPERATURE CONTROL UPDATE

MOISTURE Link™

REMOTE WEB VIEW

INTUITIVE TOUCH SCREEN

Key Features:

Auto Moisture Control

Take the hassle out of manually adjusting the dryer speed control. The embedded MoistureLink™ Drying Technology keeps accurate and precise moisture of grain exiting the dryer.

Auto Temperature Control

No more manual control of your plenum temperature! Use the digital display and readout to set and monitor the temperature inside the dryer.

Remote Access

Stay informed of your dryer's status through a web based log-in portal. Change plenum temperature, target discharge moisture & more from anywhere in the world.

Bushel Counter

Keep track of the volume of grain passing through the dryer. Set the bushel stop for any volume of grain to be discharged and let the dryer shut itself down when it's reached.

Text & E-Mail Notification

Have piece of mind knowing that the dryer will notify you in the event of a shutdown. It can also send you status updates as often as you would like.

Alarms

Let the dryer shut itself down if the moisture reaches a critical low or high moisture point determined by the operator.

Trend Analysis

Historical discharge moisture content is graphed against the desired setpoint.
